1 Overview

This article describes how to configure Outlook to use Office 365 mail system.

2 Configuration Steps

2.1 Step 1: Check Office version

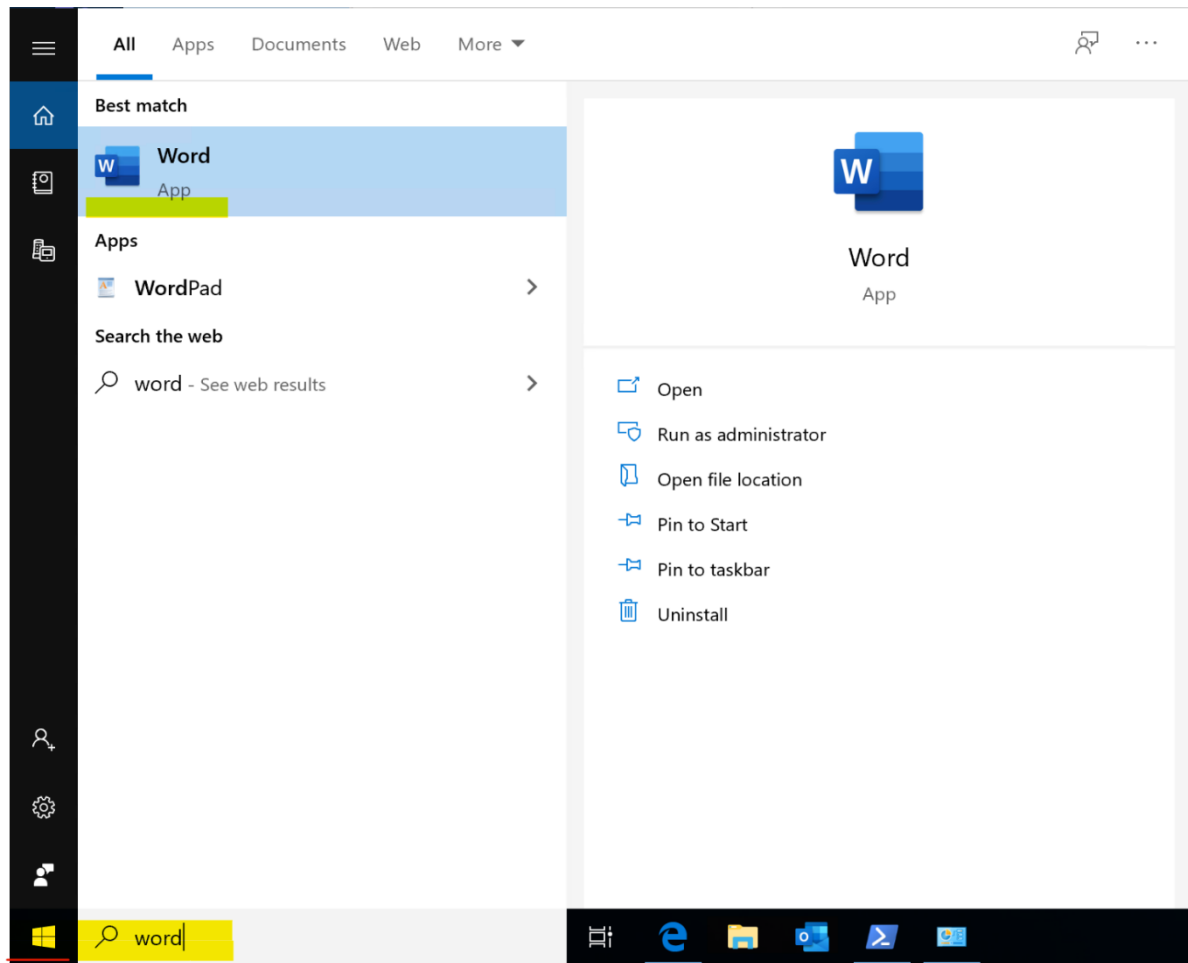

Before setup outlook on your PC, make sure the office version is one of below:

- Office 365 Pro plus
- Office 2016
- Office 2013 SP1+

Notes: We recommend using *Office 365* for best experience.

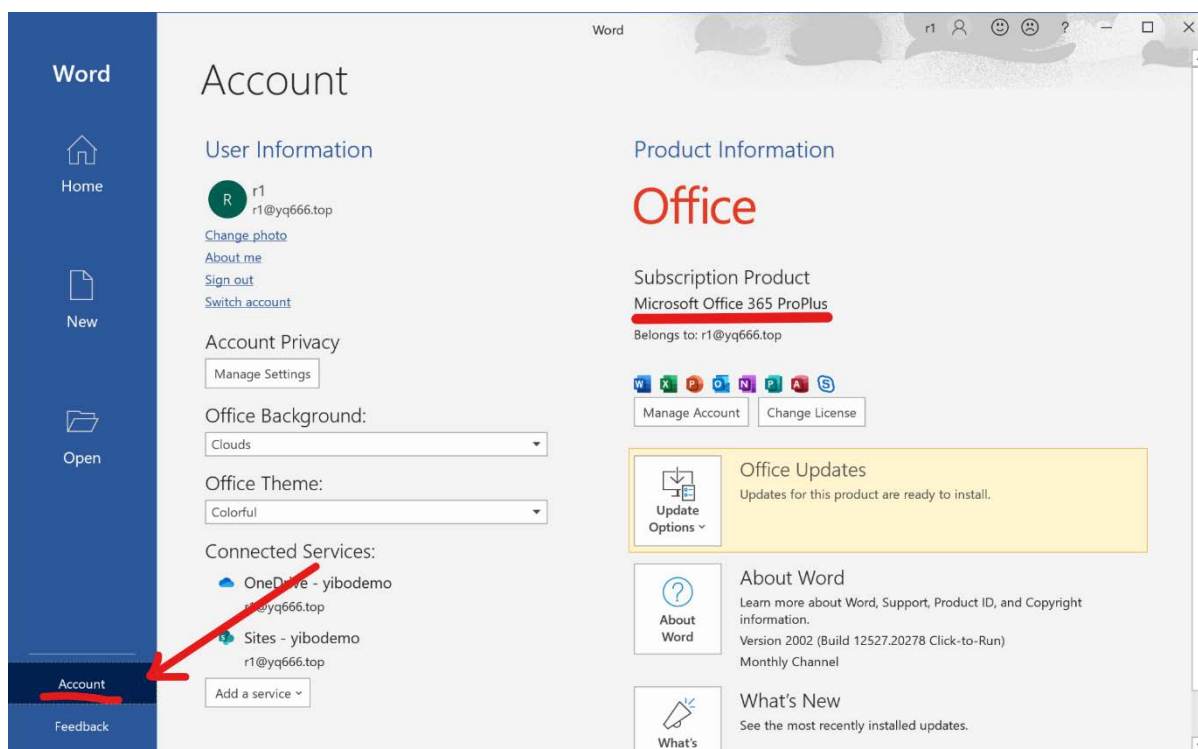

2.1.1 How to check Office version

1. Type “word” on search window in the task bar, then click the word icon in the search result.
-

Notes: if the search result is blank or nothing, it means you haven't installed Microsoft Office, please contact IT support to install office.

2. Once Word is open, click "account" on the left side, then you will see the Office version on the right that installed.

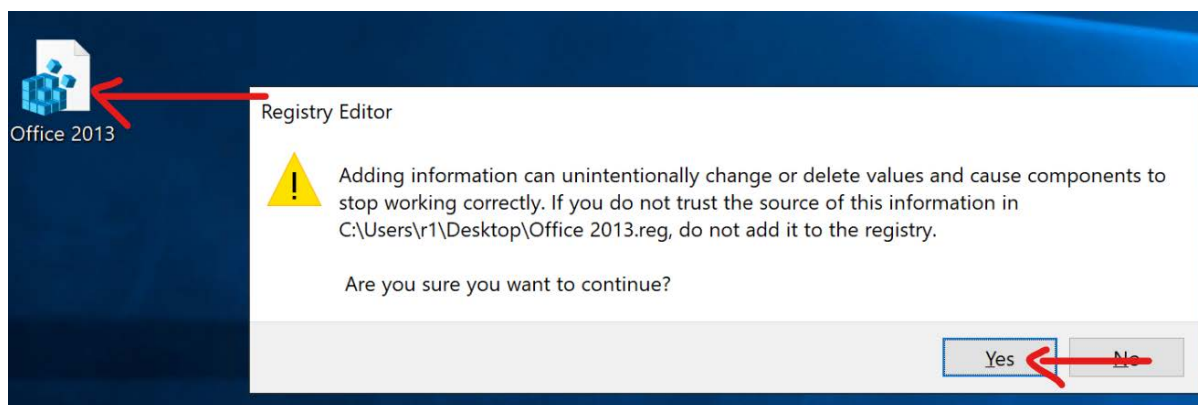

3. If the Office installed on your PC is Office 365 ProPlus or Office 2016 version, please go ahead to chapter 2.2.

4. If the Office installed on your pc is Office 2013 version, you need to add register item into your computer for Outlook 2013 working correctly with O365 email service.

office2013register.zip

Notes: After unzip the Office2013register.zip, you need change the file extension from .txt to .reg, and then double click the reg file.

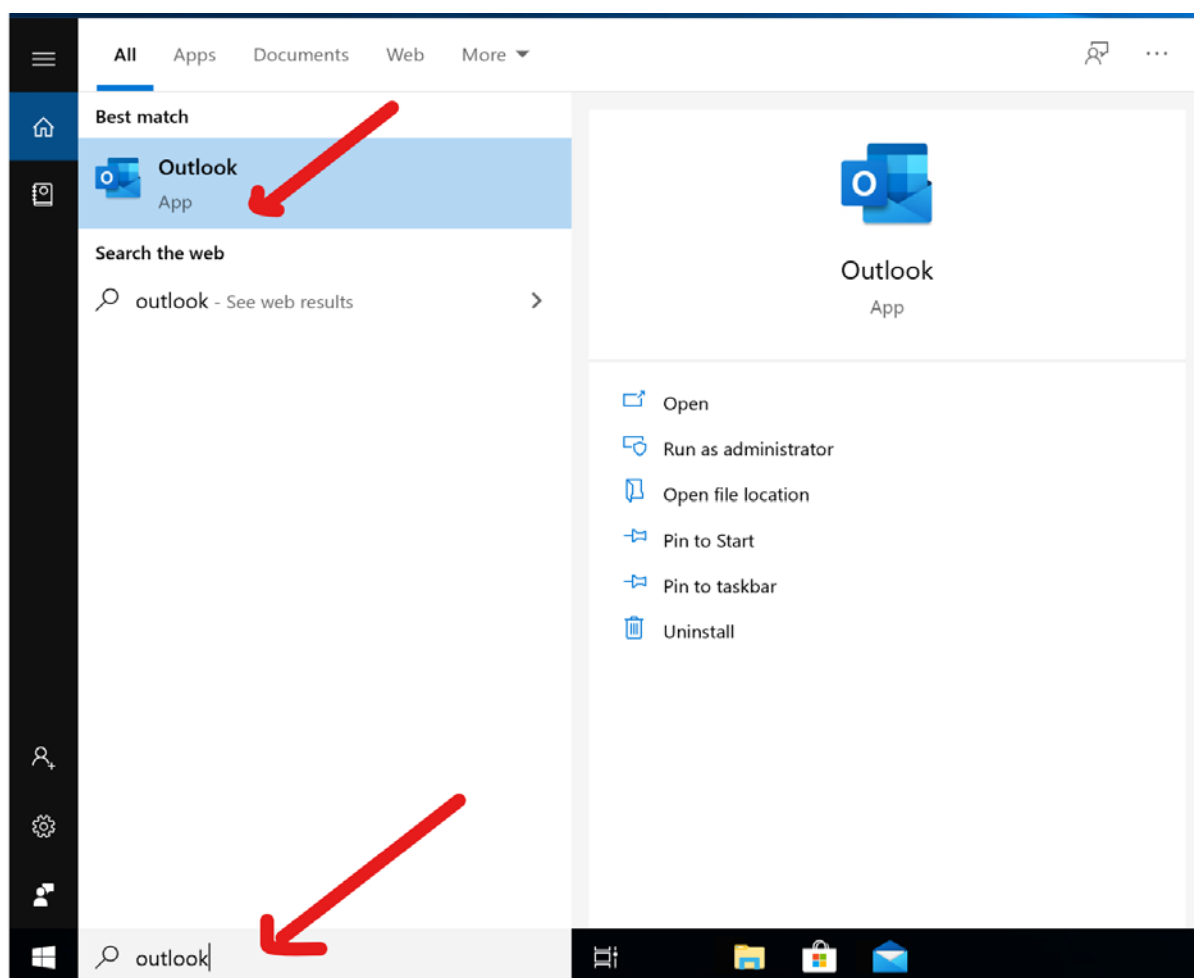

2.2 Step 2: Set your Outlook

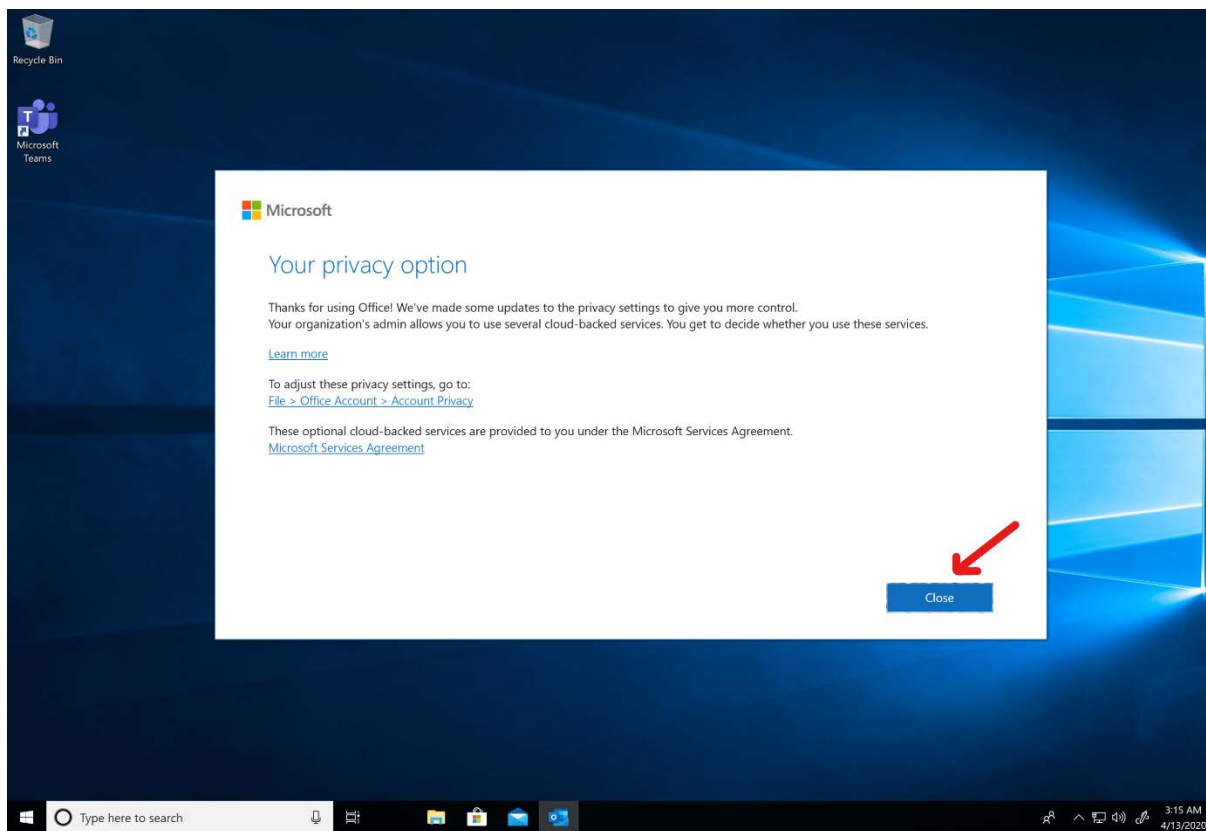

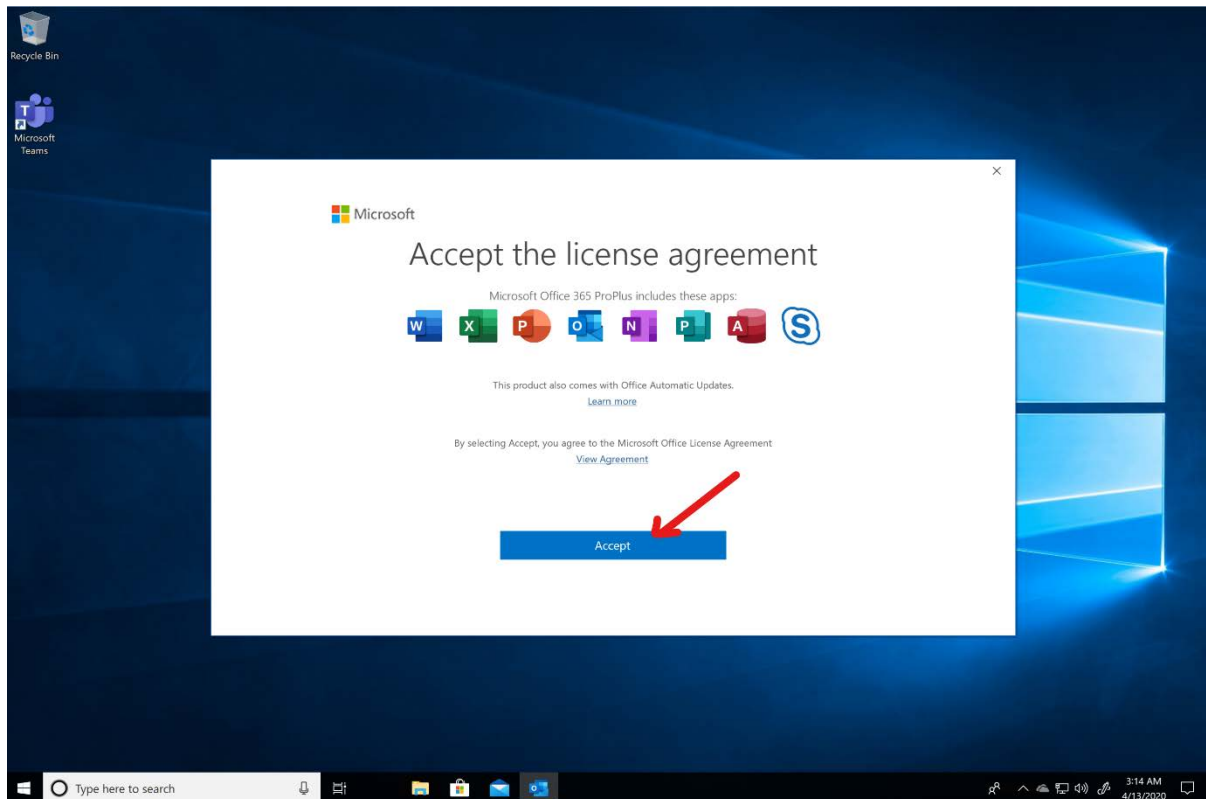

- If you have started using Outlook and the email account has been added is not your Mindray email account (For example , you add your personal google email account to your outlook), please go to [chapter 2.2.3](#) to set your Outlook.
- If you have started using Outlook and the email account has been added is your Mindray email account, please go to [chapter 2.2.4](#) to set your Outlook.
- If this is the first time you are using Outlook in Mindray Office, follow the steps in the [chapter 2.2.1](#) to set your Outlook.
- If this is the first time you use Outlook at home, follow the steps in the [chapter 2.2.2](#) to set your Outlook.

2.2.1 Setup Outlook first time in Mindray Office

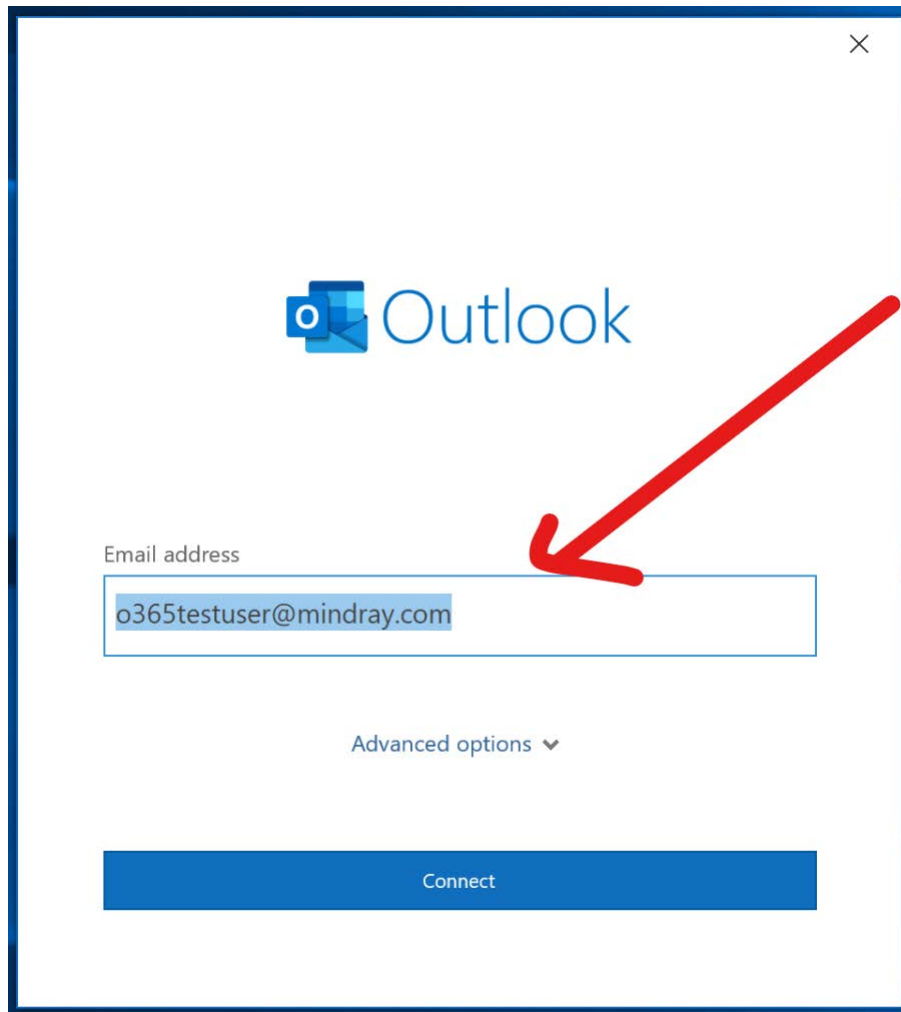

1. Search Outlook in the windows task bar and open it.

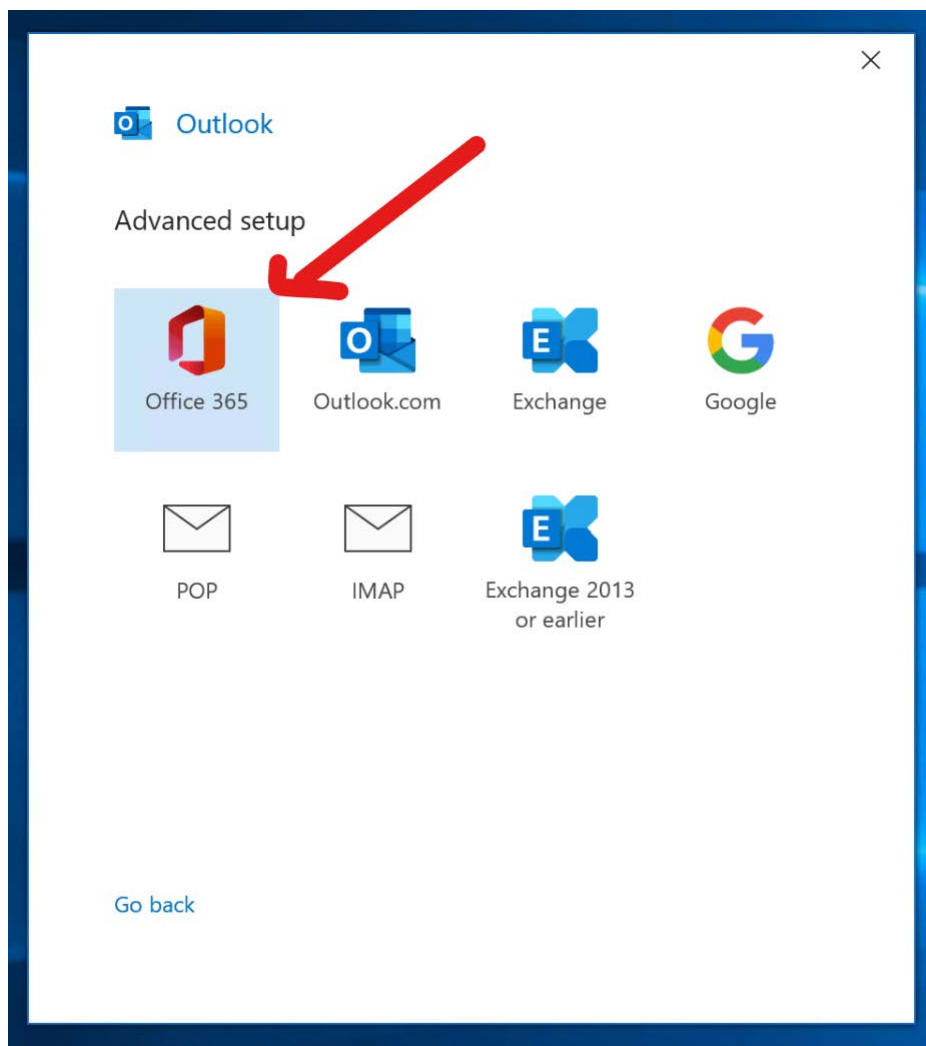

2. If you see below picture, just click accept and close.

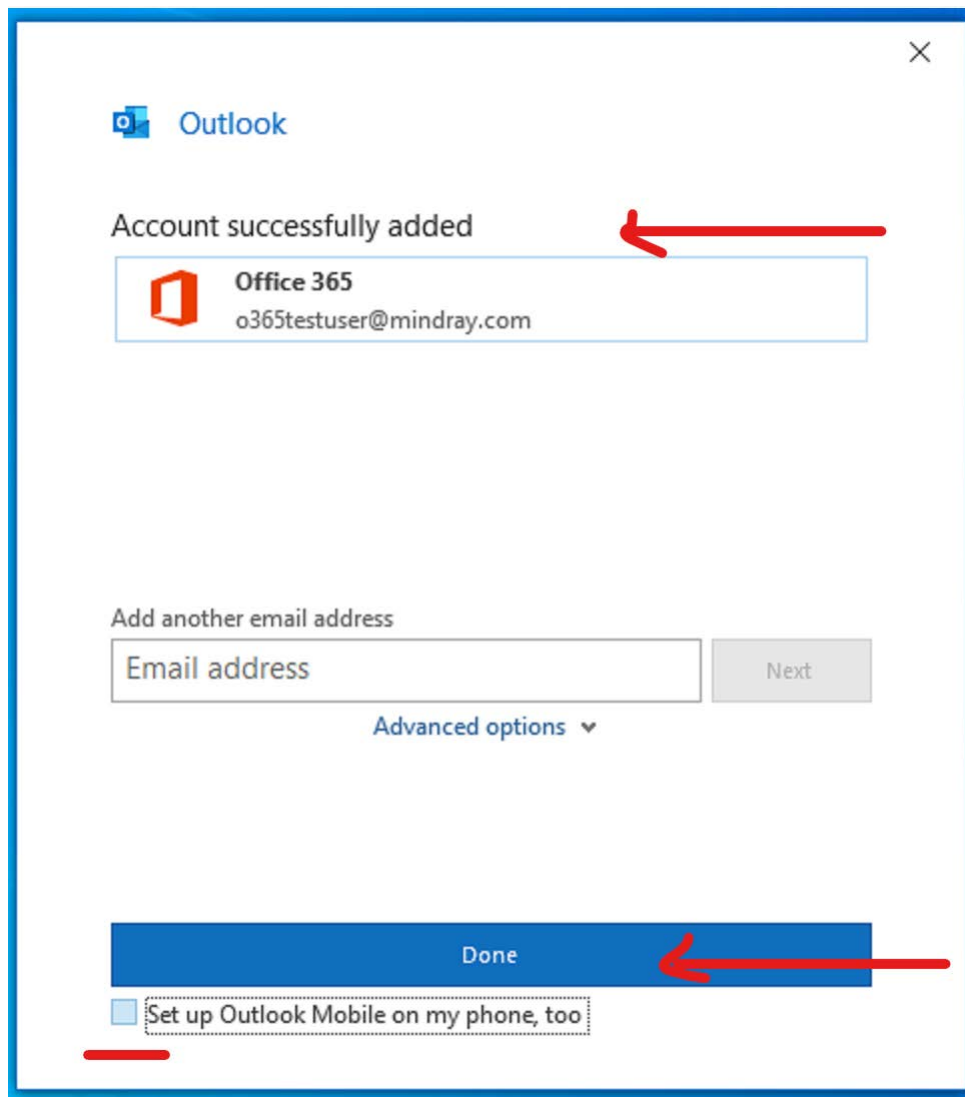

3. Outlook will auto check and fill your email address automatically, then just click connect and wait a few seconds.

4. Click Office 365

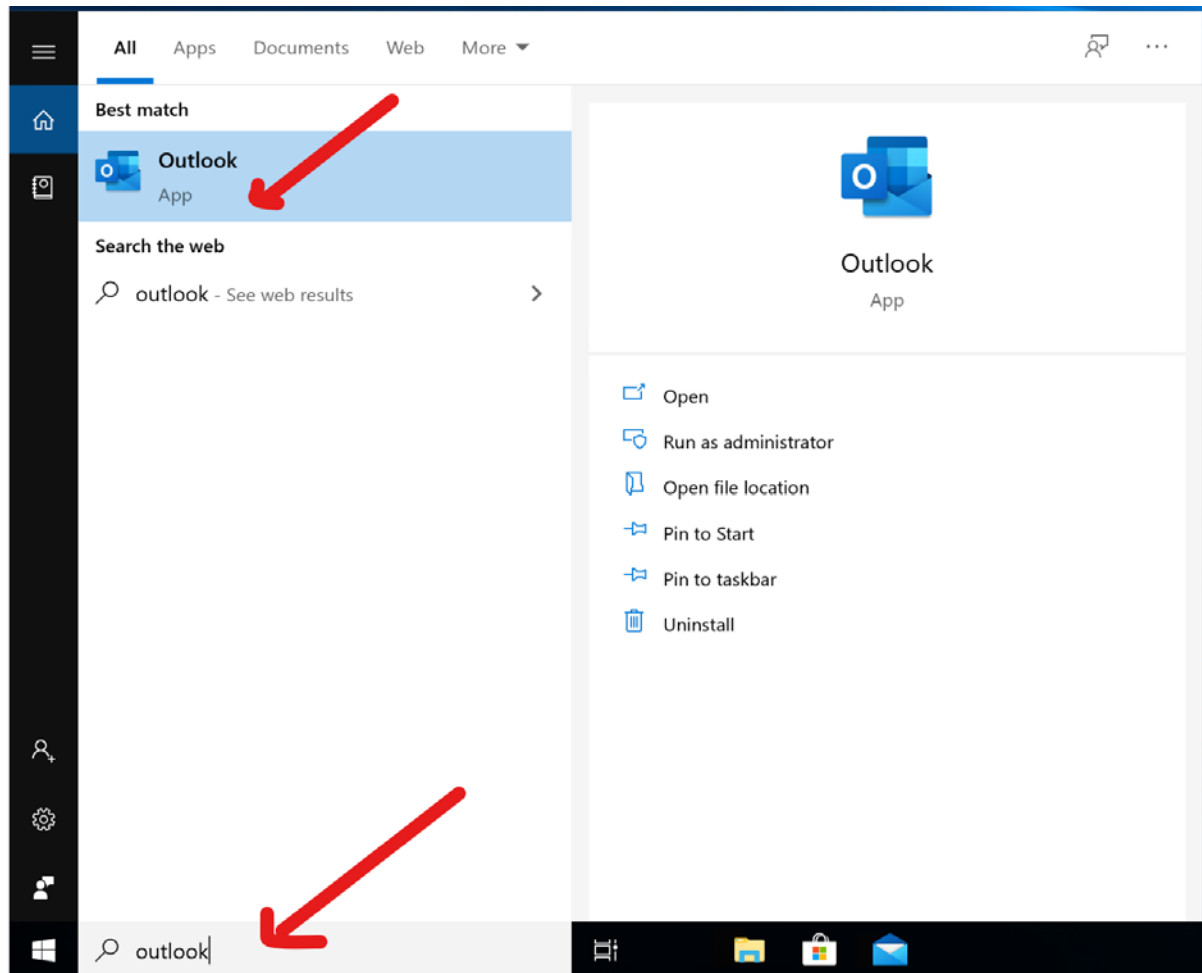

5. Just wait for a moment, you will see the “Account successfully added” like below picture. And then **CANCEL “Set up outlook Mobile on my phone, too” option**, and then click “Done”

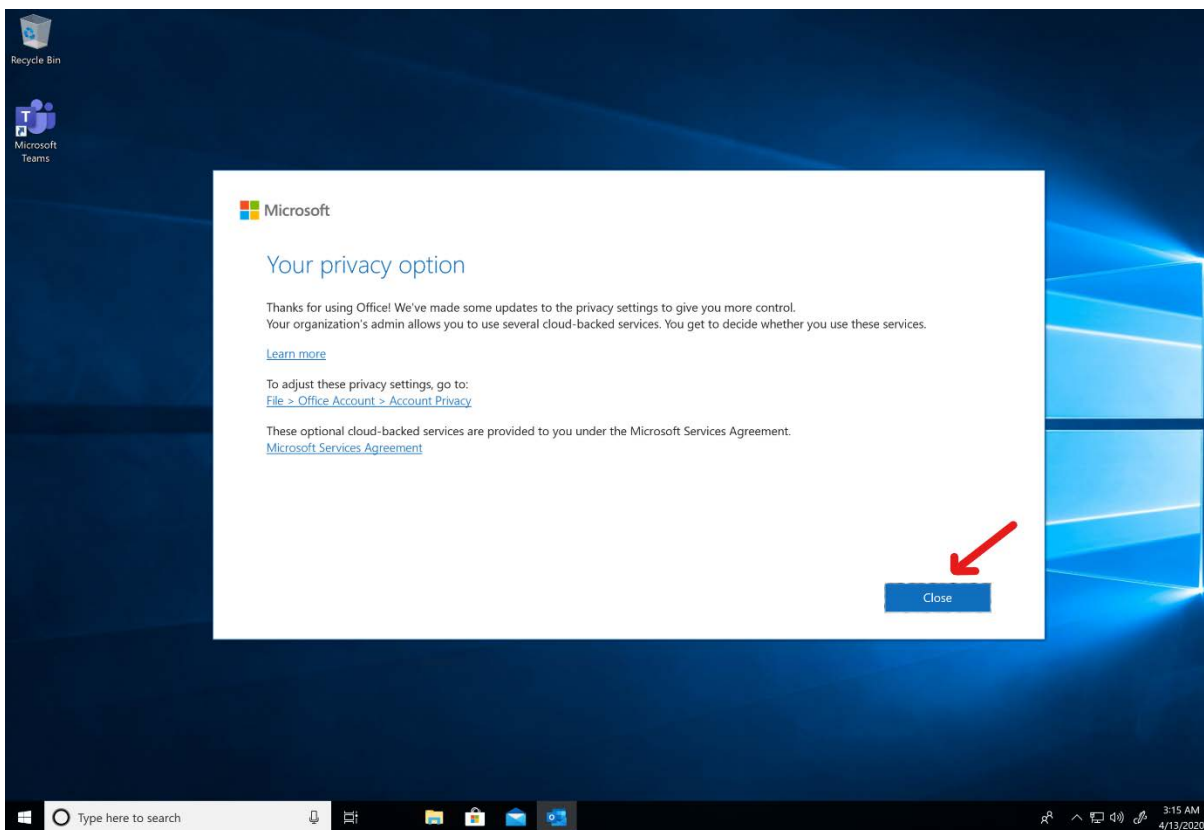

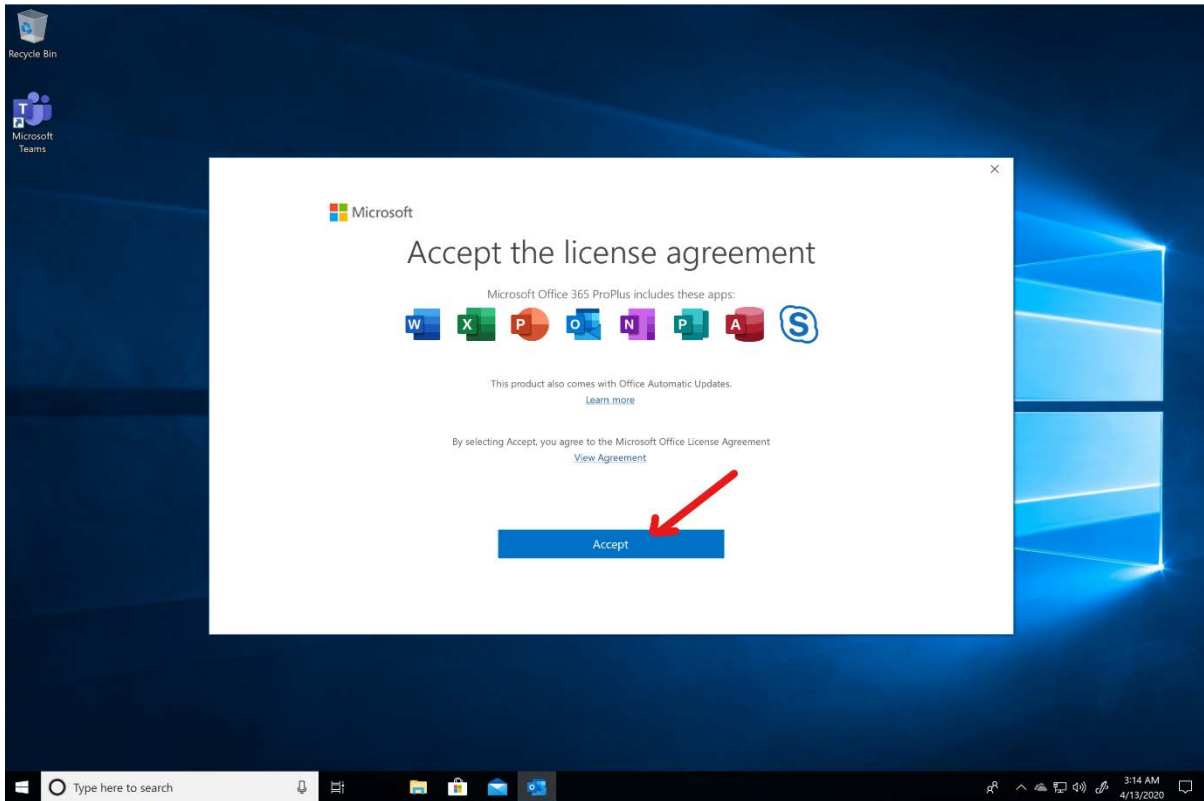

6. Once Outlook has loaded the profile; you will be in Outlook window and your Outlook is configured successfully.

2.2.2 Set Outlook at home first time

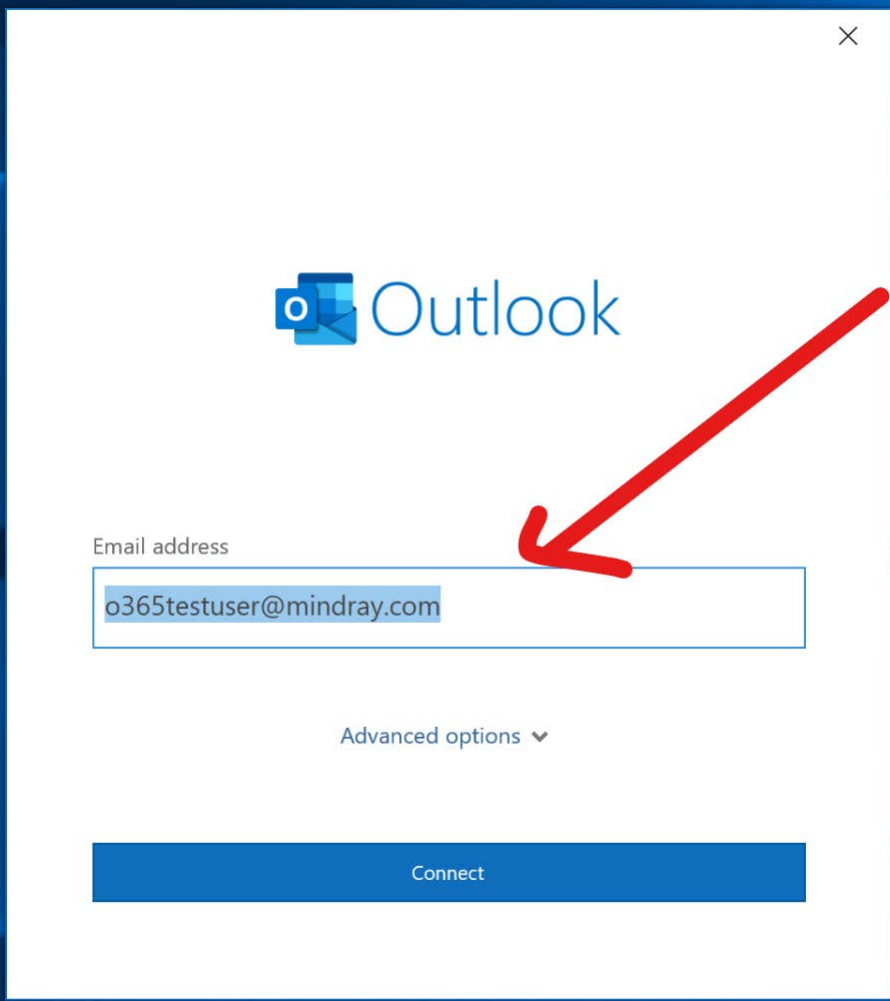

1. Search Outlook in the windows task bar and open it.

2. If you see below picture, just click accept and close.

3. If your Outlook doesn't fill the Email address field, you should fill the email address with your Mindray email address, then click connect.

6. On the “use this account everywhere on your device” page, click yes.

✕

Use this account everywhere on your device

Windows will remember your account and make it easier to sign in to apps and websites. You won't have to enter your password each time you access your organization's resources. You may need to allow them to manage certain settings on your device.

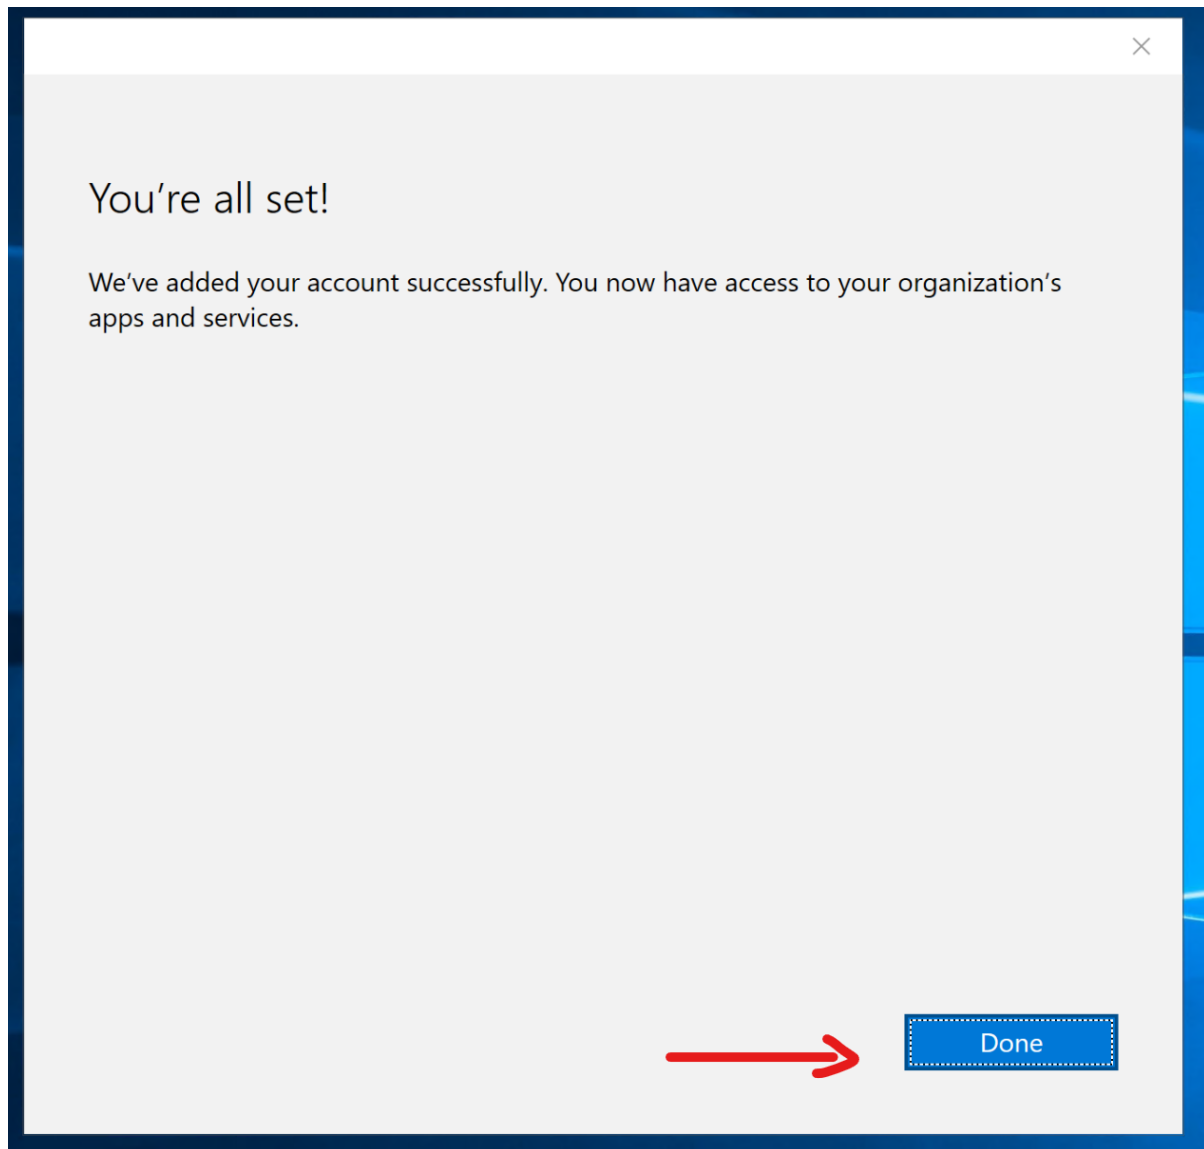

☒ Allow my organization to manage my device

This app only

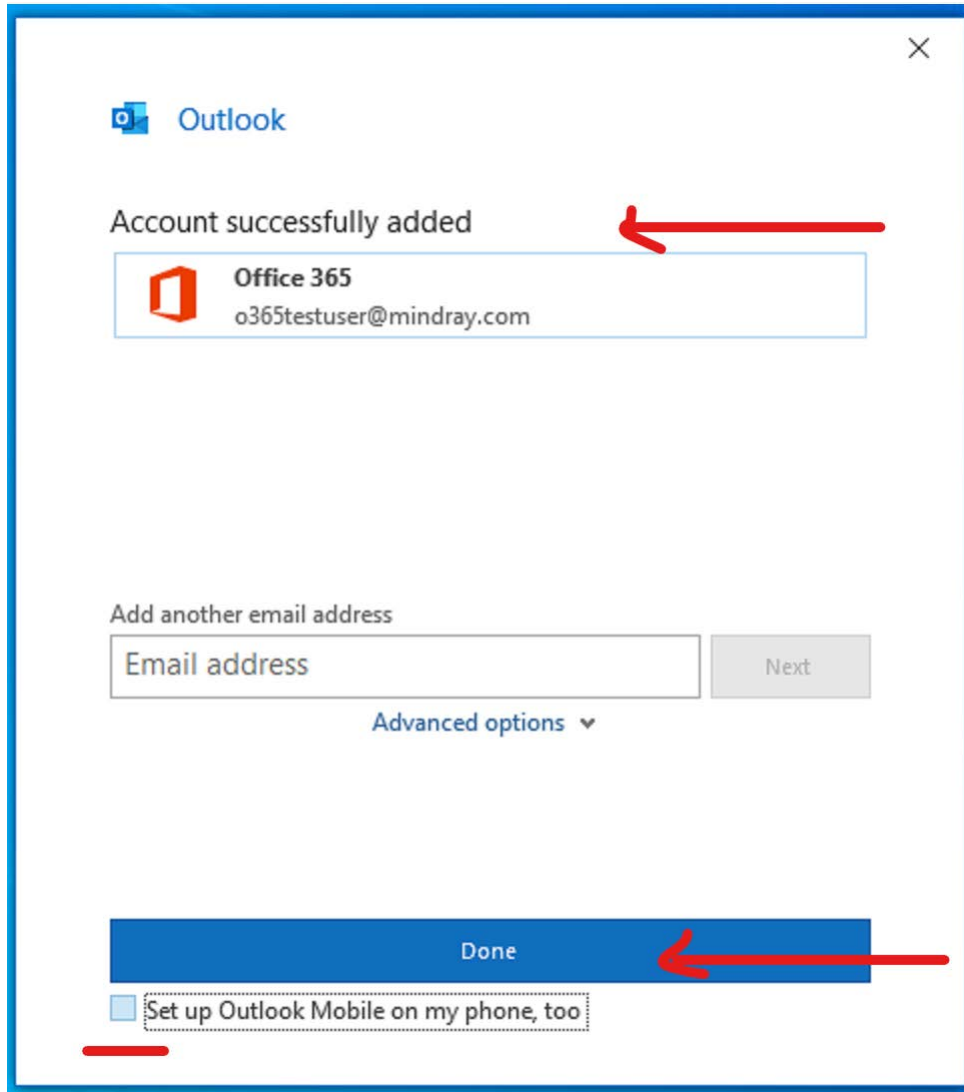

Yes

7. Click done to finish.

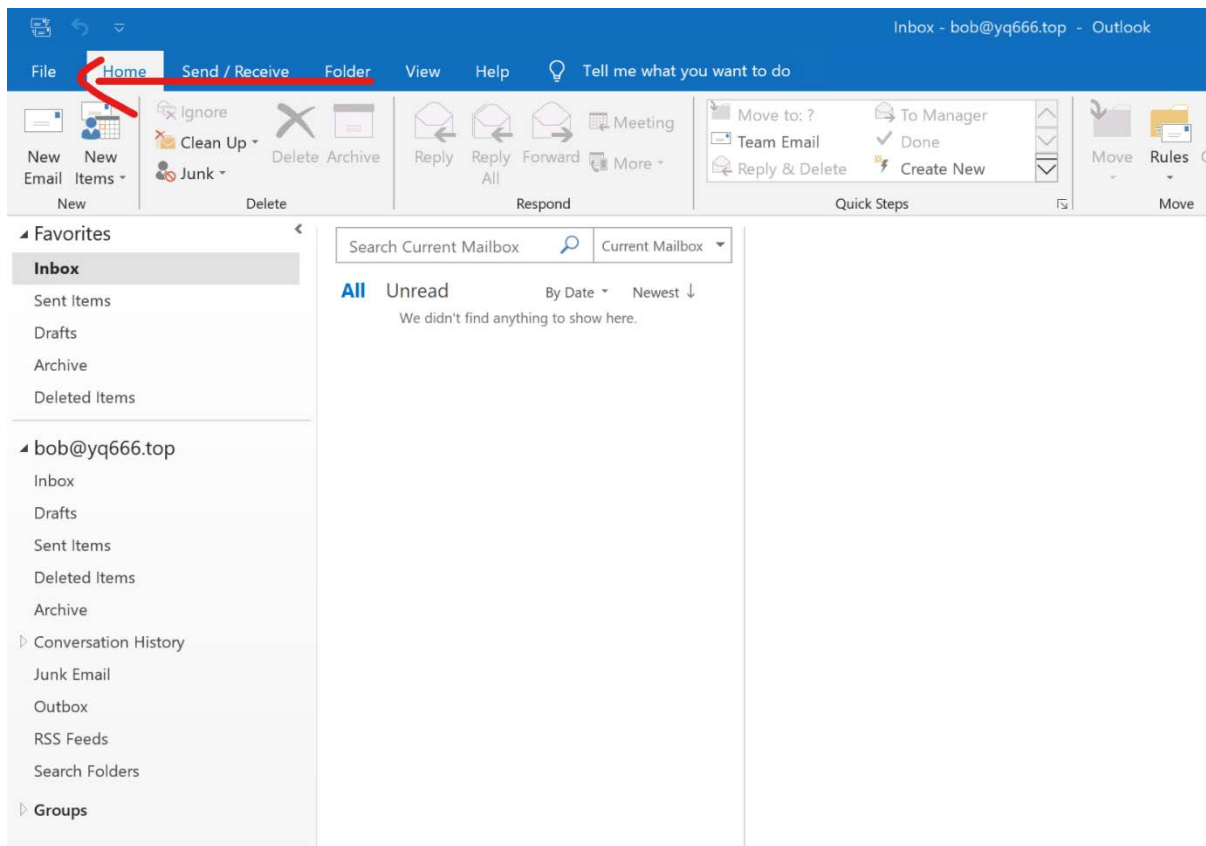

8. Finally, Outlook will show that it has successfully added your account. then **CANCEL** “Set up Outlook Mobile on my phone, too” option, and then click “Done”.

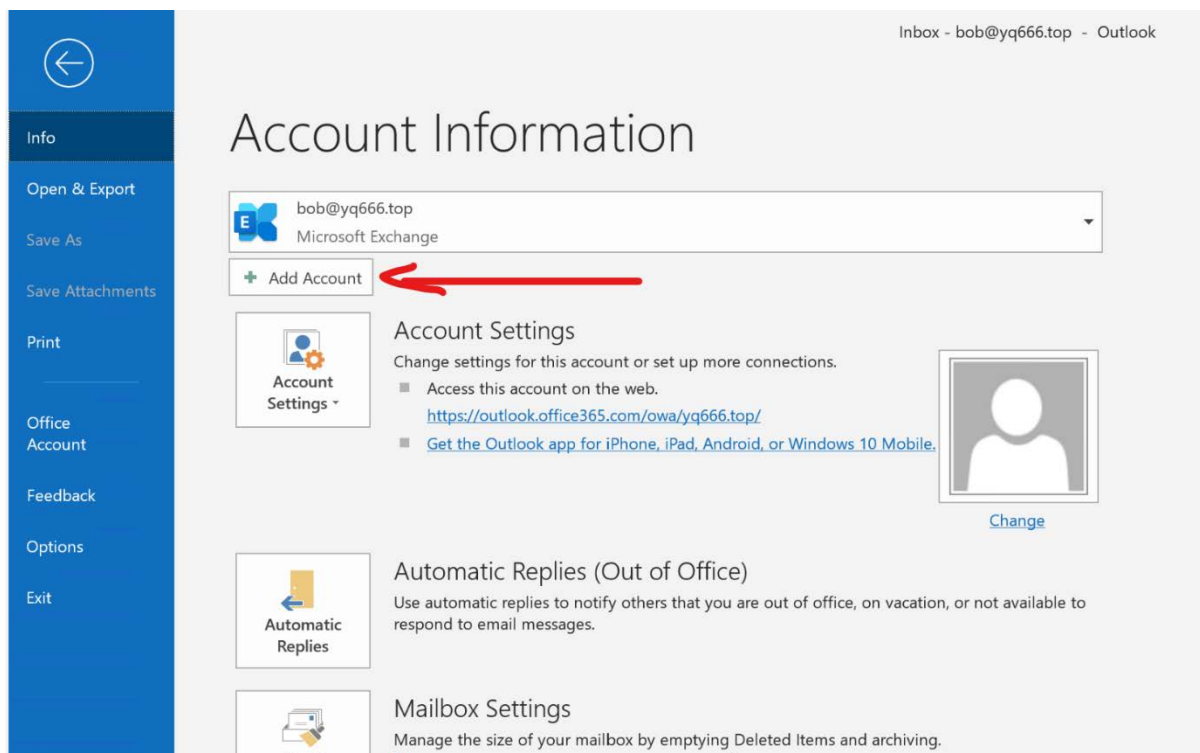

2.2.3 Set Outlook If you have started using outlook and the email account has been added is not your Mindray email account

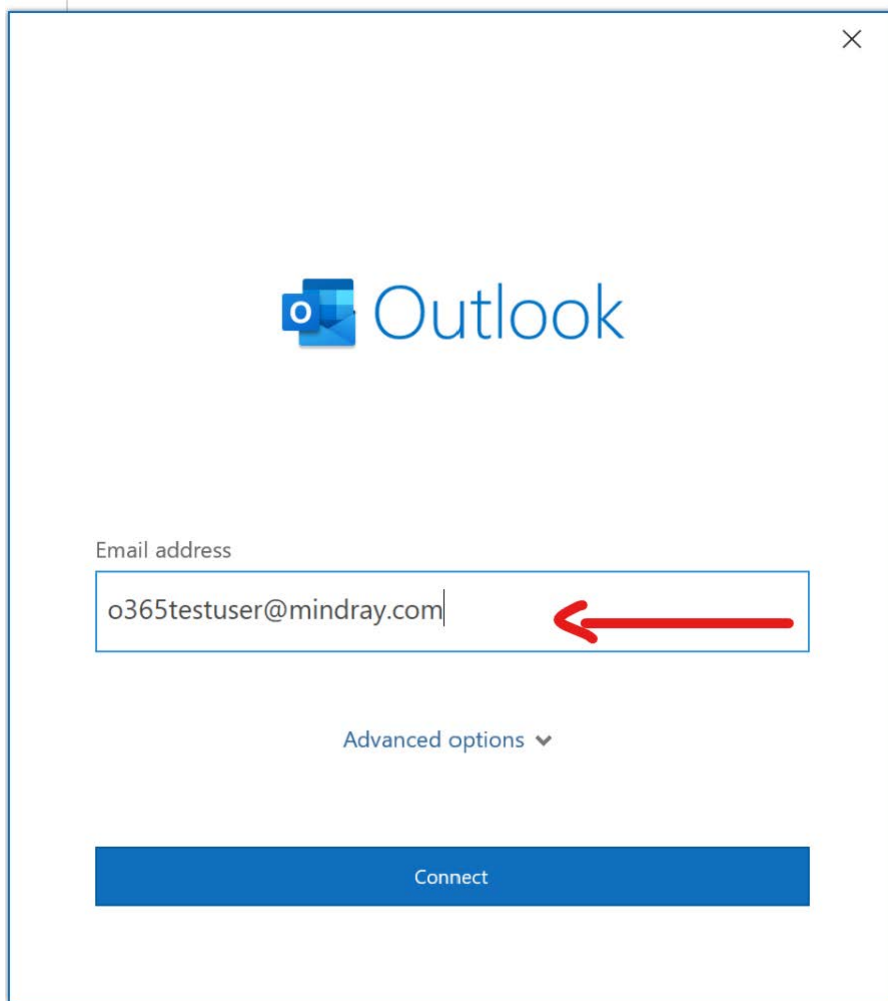

1. Click “file” on the top of left

2. Click “add account”

3. Input your Email address.

The image shows a screenshot of the Outlook login window. At the top right is a close button (X). In the center is the Outlook logo. Below the logo is a text input field labeled "Email address" containing the text "o365testuser@mindray.com". A red arrow points to the end of the text in the input field. Below the input field is a link labeled "Advanced options" with a downward arrow. At the bottom is a blue "Connect" button.

Sign in with your organizational account

Sign in

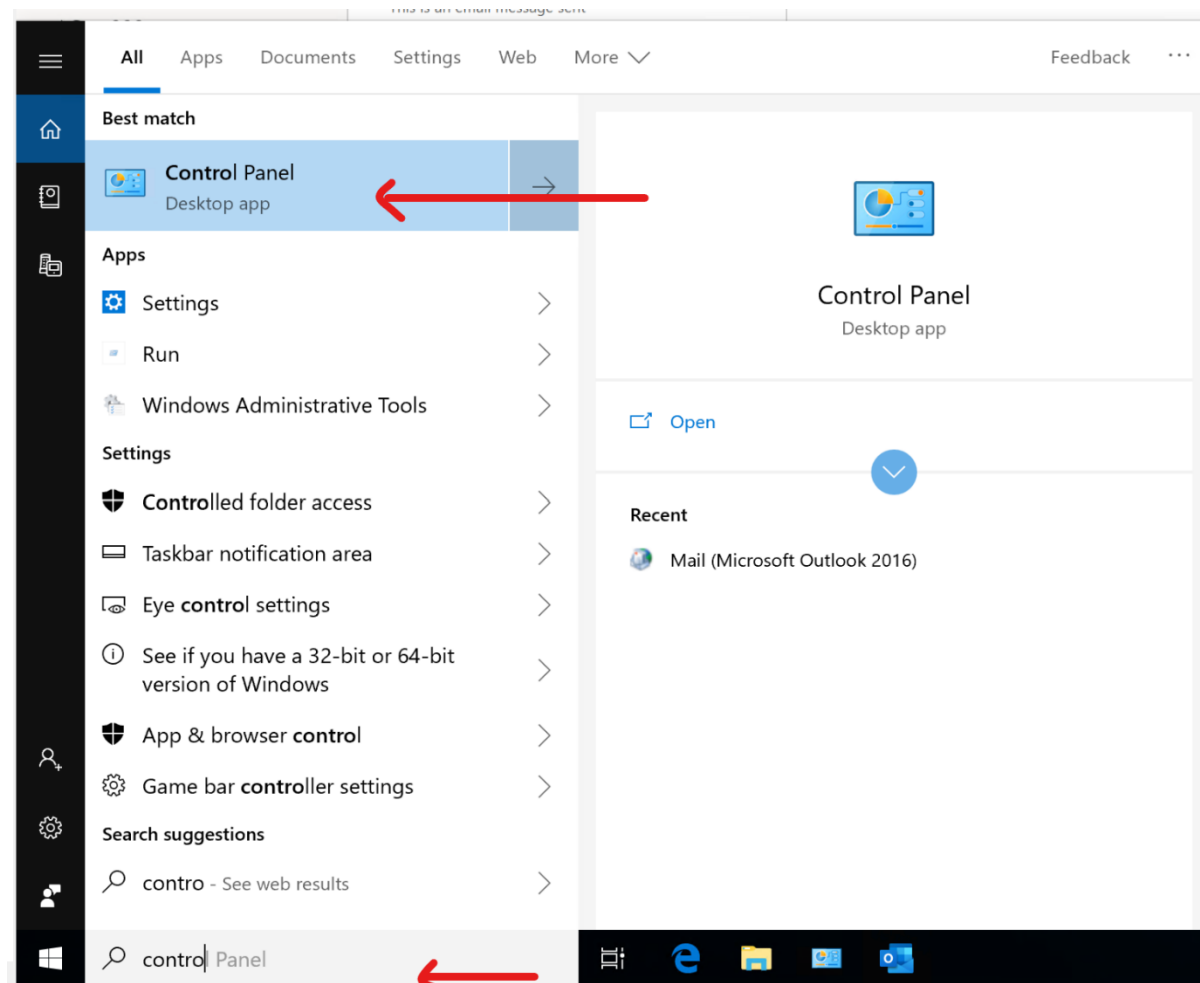

Sign-in with Mindray email address and AD/IAM password.

8. Waiting for successfully add your second account.

9. Set the profile "Office365" as prefer when open Outlook.

3 How to use Outlook on the Web

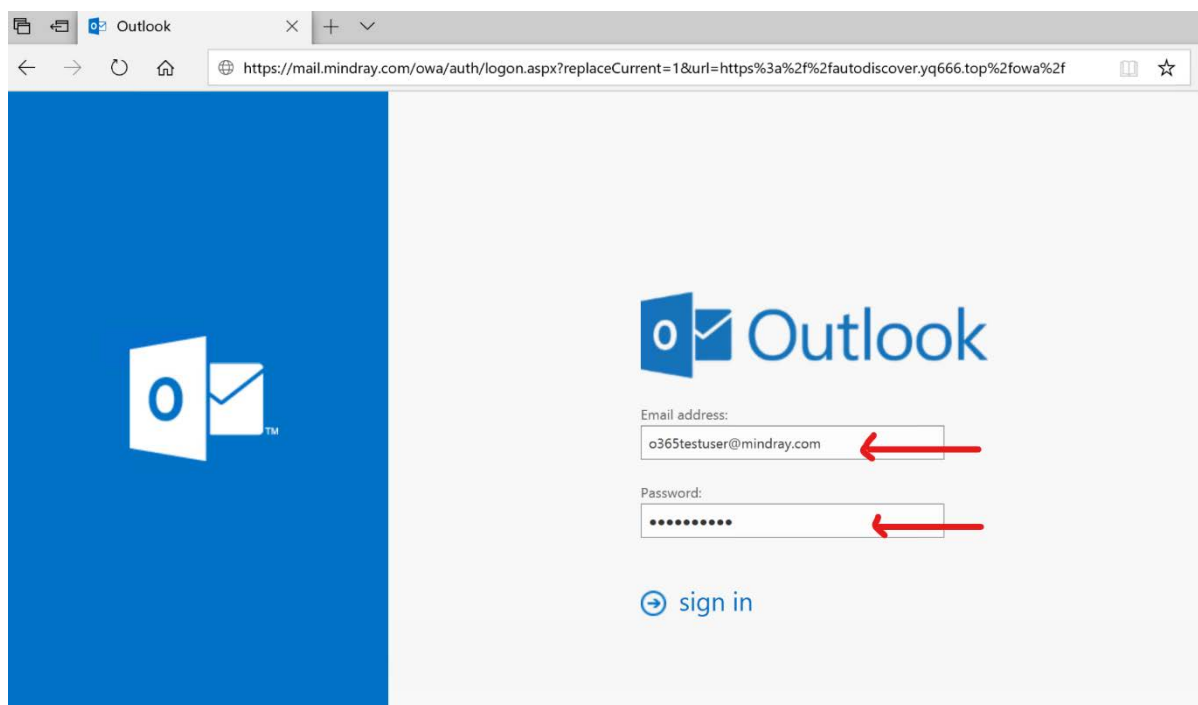

You can choose to use “Outlook on the web” to connect your Office 365 mailbox, if sometimes your Outlook does not work.

Just open browser on your computer, Edge, Firefox, Chrome; any one of these is enabled for use with connecting to Office 365.

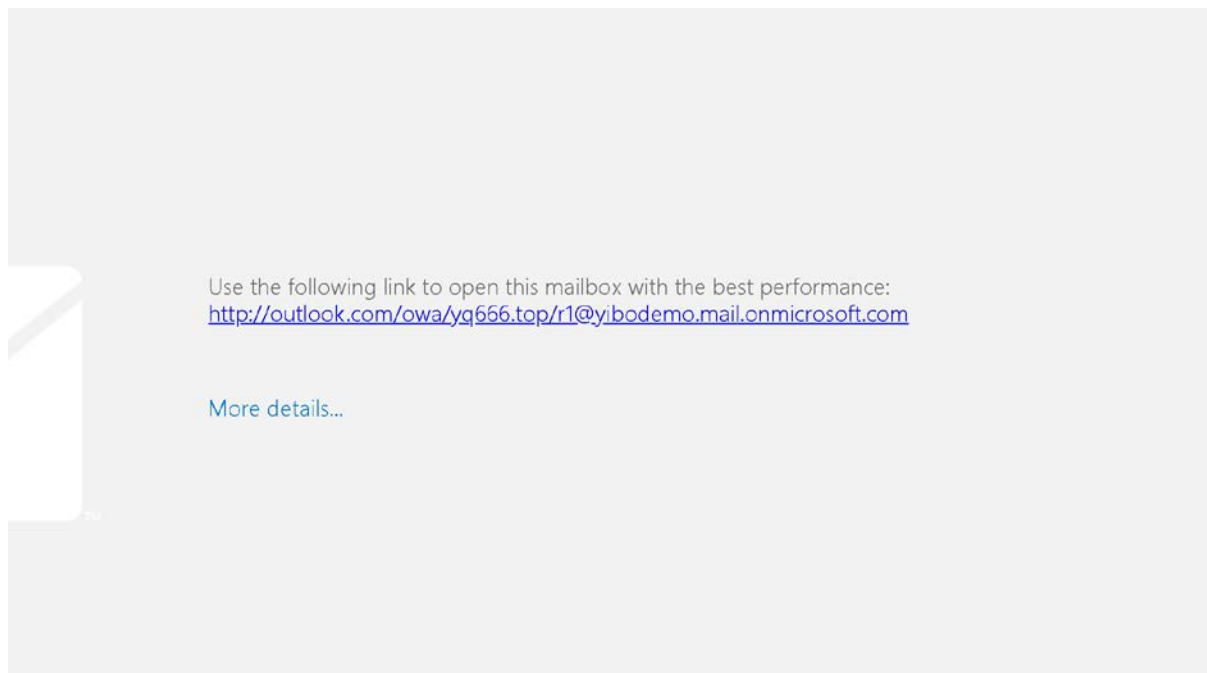

The URL for connect to Mindray Office 365 mail service is:

<https://mail.mindray.com>

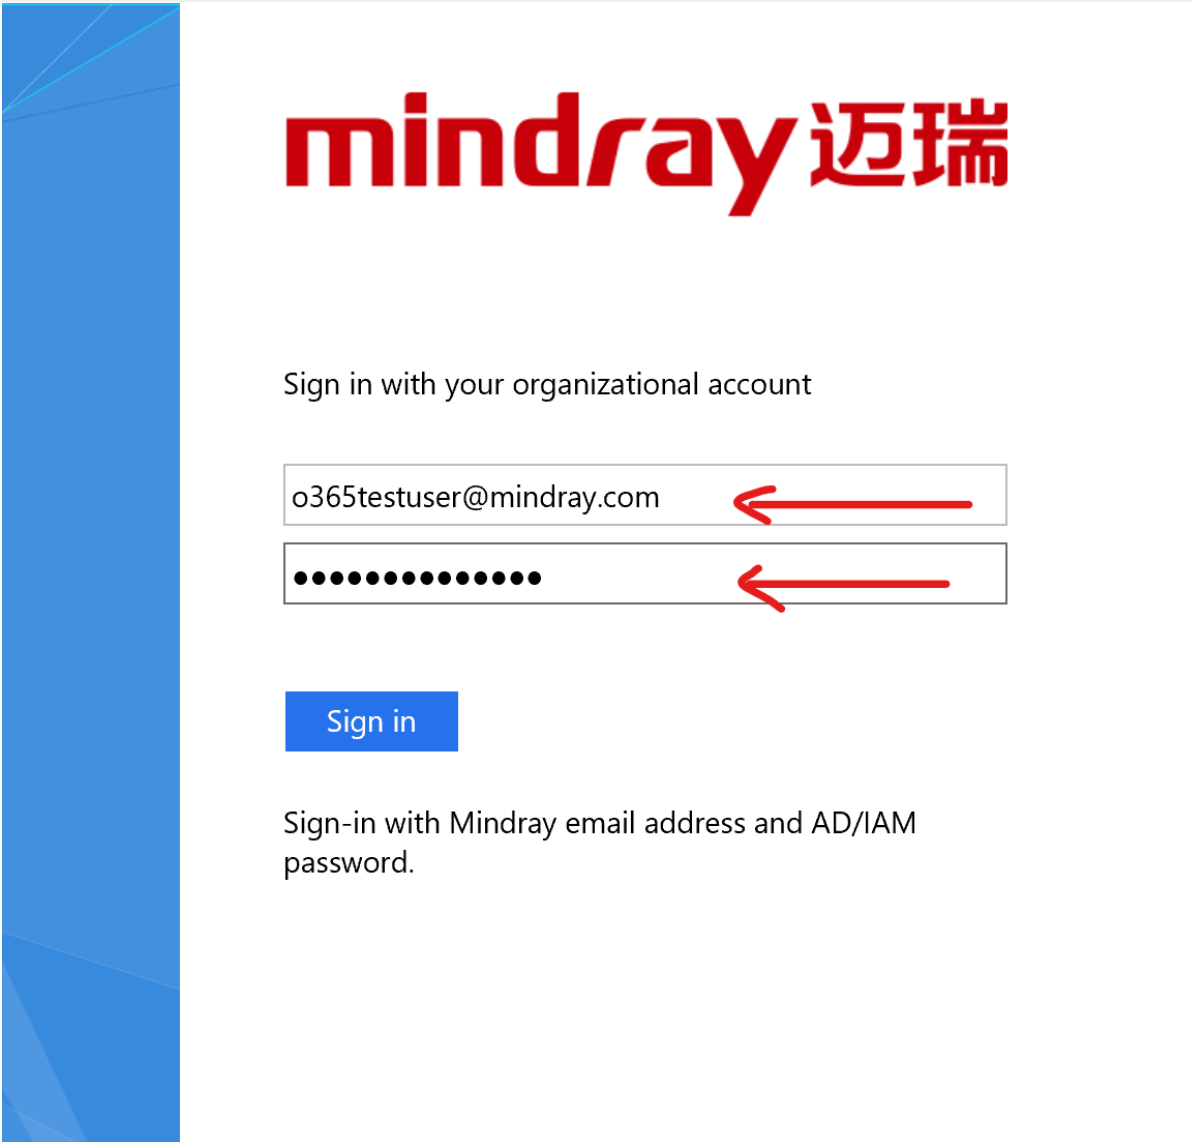

1. Input your email address and password.

2. The browser will redirect you to connect Office 365, just click the link on the browser, as shown below.

3. On the next page, input your email address and password, and then click 'SIGN IN'.

The image shows a login page for Mindray. On the left is a blue vertical bar with a geometric pattern. The main area is white. At the top, the 'mindray' logo is in red, followed by the Chinese characters '迈瑞' in black. Below the logo, the text 'Sign in with your organizational account' is displayed. There are two input fields: the first contains the email address 'o365testuser@mindray.com' and the second contains a masked password represented by 12 dots. Red arrows point to the right of each input field. Below the fields is a blue 'Sign in' button. At the bottom, there is a link that says 'Sign-in with Mindray email address and AD/IAM password.'

4 How to use your mobile device for connecting to Office 365 Email service

You can choose the built-in Mail APP or Outlook APP (which can be download from APP store) to receive/send emails on your smartphone.

4.1 Using Mail APP

4.1.1 Using mail app in IOS (iPhone)

1. Open mail app.

2. Follow the steps below:

Set up an Office 365, Exchange, or Outlook.com email in the iOS Mail app

1

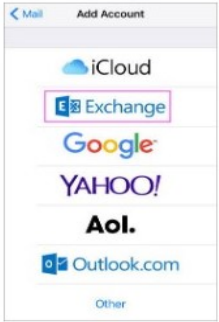

Go to your iPhone or iPad's **Settings** > scroll down and tap **Accounts & Passwords** > **Add Account**.

Note: If you're on iOS 10, go to **Mail** > **Accounts** > **Add Account**.

2

Select **Exchange**.

3

Enter your Office 365, Exchange, or Outlook.com email address and a description of your account. Tap **Next**.

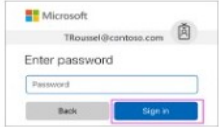

Tap **Sign In**.

Note: Tap **Configure manually** if you need to enter **server settings**.

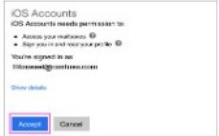

4

Enter the password associated with your email account. Tap **Sign in** or **Next**.

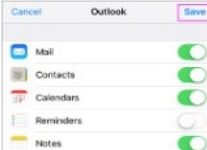

5

The Mail app may request certain permissions. Tap **Accept**.

6

Choose the services you want to sync with your iOS device and tap **Save**. You're done!

For more details you can refer to the follow link:

<https://support.office.com/en-us/article/Set-up-email-using-the-iOS-Mail-app-7e5b180f-bc8f-45cc-8da1-5cefc1e633d1>

4.1.2 Use mail app in android

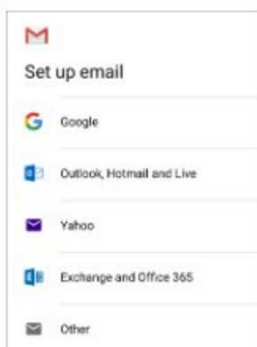

Android has lots of versions based on brand, generally the mail app is same. The basic set up process is same as on IOS. Just open mail app on your phone and add your email account.

1

Open the Gmail app.

Tap the menu icon in the upper left corner > **Settings** > **Add account** > **Exchange and Office 365**.

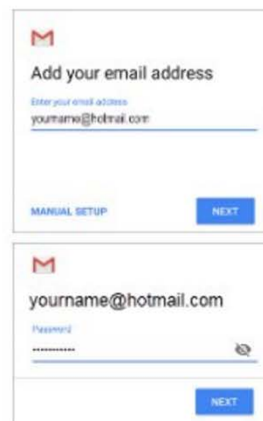

Important: Do **NOT** choose "Outlook, Hotmail, and Live" unless you want to sync email only and not calendar/contacts.

2

Enter your full email address and tap **Next**.

Enter your password and tap **Next**.

3

Follow steps for your account type:

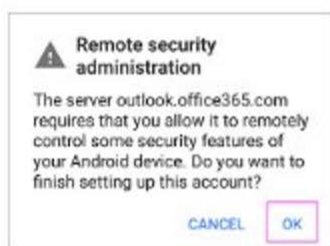

- Outlook.com users: skip this step
- Exchange or other accounts: you may have to ask your IT admin or email provider for server settings and [set up your account manually](#)
- Office 365 work or school: you may see a **Redirect request** screen. Tap **OK**.

On the Incoming server settings screen, change your server to **outlook.office365.com**.

4

Follow any prompts you may get for security or device permissions, sync settings, and more.

If you have an Office 365 work or school account, you may also be asked to confirm **Remote security administration** and approve additional security measures. In this case, choose **OK** or **Activate**.

5

Go to the inbox you just set up. If you see an email that says **"Action Required to Sync Email,"** open it and tap **Use another Mail app instead**.

If you don't see this message and emails are syncing, skip this step.

6

Pull down the Android notification bar by swiping down from the top of your screen.

If you see a notification that reads **"Unable to sync calendar and contacts,"** tap it. Then tap **Allow** to give access and you're done!

Note: If you don't see a sync error, verify your calendar and contacts are syncing.

4.2 Using Outlook APP

Microsoft provide an Outlook app on IOS and Android, you need to download the app from the app store first, some newer Android devices have this preinstalled.

4.2.1 Using Outlook for IOS (iPhone)

1

Note: If you have a work account that requires the **Intune Company Portal** app, install it from the App Store before setting up Outlook for iOS. Your IT admin may or may not also require you to [Enroll your iOS device in Intune](#).

Download Outlook for iOS from the [iOS App Store](#) and then open it. The icon looks like this:

Note: See system requirements for your iOS devices [here](#).

2

If it's your first time using Outlook for iOS, enter your full email address, then tap **Add Account**.

If not, open the **Menu** > tap **Settings**  > **Add Account** > **Add Email Account**.

A screenshot of the 'Add Account' screen in the Outlook for iOS app. The screen has a white background with a blue header bar containing a close button (X) and a help button (?). Below the header, it says 'Enter your work or personal email.' followed by a text input field containing 'yourname@yourdomain.com'. At the bottom, there is a blue button with the text 'Add Account' highlighted by a pink rectangular border.

3

If you're asked to select your email provider, please contact your IT admin for support as there may be a misconfiguration.

You can also [set up your email account manually](#) or use IMAP/POP.

4

Enter your email account password and tap **Sign In**.

Note: The sign in screen may look different for you depending on your email provider.

4.2.2 Using Outlook for Android

Set up Outlook for Android for the first time

1

Note: If you have a work account that requires the **Intune Company Portal** app, install it from the Google Play Store before setting up Outlook for Android. Your IT admin may or may not also require you to [Enroll your Android device in Intune](#).

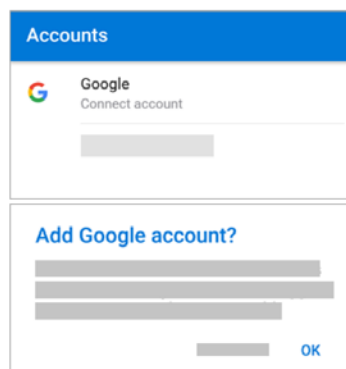

Install the **Outlook for Android** app from the [Google Play Store](#) and then open it.

Tap **Get Started** if this is your first time.

Otherwise, to add another email account, open the **Menu**  > **Settings**  > **Add Account** > **Add Email Account**. Then skip to step 4 under [Set up another email account](#) below.

2

Outlook may detect your Google accounts. To add them to Outlook for Android, tap **Google** **Connect Account** and then tap **OK** to confirm. Tap **Allow** to give Outlook access to your Contacts.

If you don't want to add these accounts, tap **Skip** and then go to step 4 under [Set up another email account](#) below..

3

Select the accounts you'd like to add and tap **Add Account**. You may be asked to sign in.

Tap **Allow** to confirm offline access and any other prompts.

To add another email account, tap **Continue** and go to Step 4, otherwise tap **Skip**.

Set up another email account

4

Enter your full email address, then tap **Continue**.

Note: If you're asked to choose your provider, you'll have to [Set up your Exchange manually](#) or [set up an IMAP or POP account](#).

5

Enter your email account password and tap **Sign In** or **Next**.

Note: The sign in screen may look different for you depending on your email provider.

6

If multi-factor authentication is enabled, verify your identity. For more information, see [Security info overview](#).

5 Changing the Outlook Language

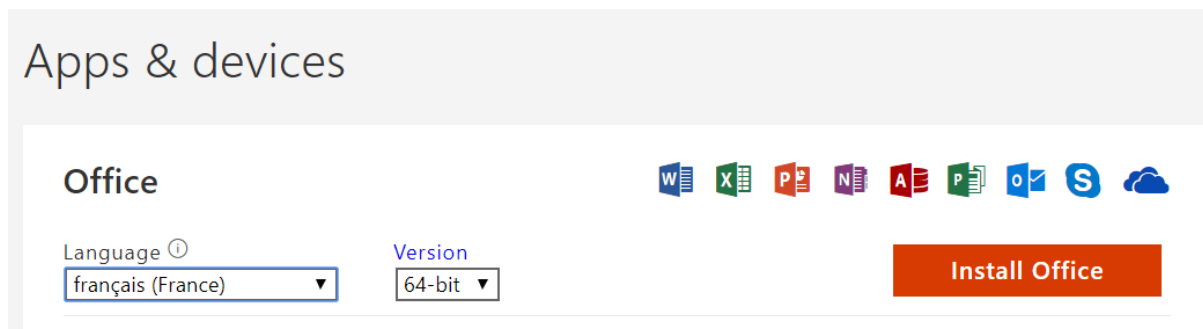

5.1.1

To change the language, you will first need to install the language pack. To do this, you first need to go to <https://portal.office.com>

Once logged in, you will see in the top right, an option to install Office. Click the drop-down list and then select “other install options”

On the new page, select “apps and devices” in the left-hand pane, change the language to desired, and click “install office”

Follow the on-screen instructions to install. Once done, open any Office program and go to files > options.

In language, select the desired language in all 3 locations, and set to default, once you restart Office the language will be updated.
